PROFESSIONAL SUMMARY

Results-driven and detail-oriented front-end developer with a strong background in crafting visually stunning and highly functional user interfaces using React.js. Leveraging a passion for clean, efficient code and a keen eye for design, I excel in transforming complex concepts into intuitive and seamless user experiences. Experienced in collaborating with cross-functional teams to deliver innovative solutions and meet project requirements. Adept at staying abreast of emerging technologies and industry trends to ensure the adoption of best practices. Eager to contribute technical expertise and creative problem-solving skills to a dynamic development team.

WORK EXPERIENCE

Title: **Software Development Intern**
Establishment: Center for Information and Technology Systems, University of Lagos, Nigeria [June 2020 – December 2020]
Job Description:

- Write, test, and debug code under the supervision of experienced developers and contribute to the development of software applications or components.
- Document code, processes and project-related information to facilitate collaboration and future maintenance
- Work with testing frameworks and tools to ensure software quality.
- Work with frontend frameworks like **React.js** to build interactive and dynamic user interfaces.
- Ensure that websites and applications are accessible to users with disabilities by following best practices and standards.
- Collaborate with backend developers to integrate frontend components with server-side logic
- Develop responsive web designs that adapt to various screen sizes and devices, providing a seamless experience for users on desktops, tablets, and smartphones.
- Monitor and analyze website performance metrics, identifying areas for improvements.

VOLUNTEER EXPERIENCE

National Youth Service Corps (NYSC)   Nov 2022 – Oct 2023

Anti-Corruption Group (Member)

- Sensitize and educate community members on the effect of corruption via rallies and usage of fliers.
- Attend outreaches organized within the communities of Osogbo, Osun State.
- Ensure meetings are effectively organized and minutes taken.
- Maintain effective records keeping on all activities

PROJECT

Project Name: Real Estate Website
Description: Developed a responsive web application for a real estate company, providing users with information about the company, its services, and featured projects. The goal was to create an engaging online presence for the company without the need for property listings or search functionality.
Role: Sole frontend developer responsible for designing and implementing the entire user interface.
Technologies Used: HTML, CSS, JavaScript, React.js.
Challenges and Solutions: Focused on creating an informative and visually appealing website without relying on dynamic property data. Implemented interactive elements to showcase the company's achievements, services, and projects.
Features:
- Homepage: Designed and implemented an attractive homepage featuring images of the company's flagship projects.
- Services Section: Created a dedicated section outlining the services offered by the real estate company, including detailed descriptions and relevant visuals.
- Project Showcase: Developed an interactive gallery showcasing key projects, allowing users to explore project details and view project images.
- Contact Form: Implemented a contact form to encourage user interaction and inquiries, enhancing user engagement.
Outcome: The real estate website successfully provided visitors with a comprehensive overview of the company's services and highlighted its key projects. The project emphasized a visually appealing and user-friendly design for a positive online presence.
